Getting Better WITH GVD

Quality, trust and superior performance are our priorities. Result-oriented, quality solutions to ensure a sustainable and efficient workflow we produce solutions and produce the products that best suit your needs.

www.gvd.com.tr

Quality, High Performance, Affordable Pricing

As a manufacturer of fixed and withdrawable type enclosures / assembled panels, we have a very significant experience in the electric power industry with PRODUCTION, DESIGN AND ASSEMBLY OF LOW VOLTAGE ELECTRICAL PANELS in our facilities in Türkiye.

As GVD, we offer high quality to our customers all over the World (more than 60 countries) with lower prices and we have been engaging the global market for 21 years; bringing all of our intellectual and technological capabilities. This talent is important and praiseworthy due to the generation of a much higher value for this market and presentation of this high value to any of our customers.

Our products have equivalent certificates with ABB, SCHNEIDER, SIEMENS and EATON (Type test certificate from Dekra&Kema ;up to 6300A, 120kA, Form 4b IEC 61439-2, Internal arc IEC 61641, Seismic qualification IEC 60068-3-3:1999, ISO 9001:2000, CE, for Empty enclosure IEC 62208, etc.).

21 Years

Why Should Choose Us?

High Performance

We produce durable and high-performance products to ensure that your business processes continue uninterrupted and you achieve high efficiency.

Affordable Pricing

While we provide excellent performance and user satisfaction in industrial facilities and energy projects with our products, we offer you this quality at more affordable prices.

Innovative and Smart Design

Our products provide solutions that exceed industry standards, equipped with high quality and reliability. It ensures that your business process continues uninterrupted with designs specially prepared for your project.

Quality and Trust

The durability of our products has been tested and guaranteed by the world's leading certification bodies. These certificates promise the highest level of trust and quality to our customers.

Fully Withdrawable MCC (WMCC) Panel Solutions - *PREMIUM* - XW

Fully withdrawable technology in Motor Control Centers (MCC) offers many advantages, especially where malfunctions must be rectified with our interrupting operation.

* Easy insertion and retraction of the fully withdrawable unites. Unlike conventional plug-in technology, there is no need to overcome the mechanical resistance of plug contacts.

* In case of any failure, the drawer can be disconnected by the contacting module and can be replaced without the need of any tool.

* Individual withdrawable modules can be quickly exchanged or added during operation without needing to switch off the system.

Fully Withdrawable MCC (WMCC) Panel Solutions - **PREMIUM - XW**

* Inserted withdrawable modules can be locked in the positions "operation", "test" and "disconnected".

* Protection against incorrect operations by safe locking mechanisms.

* Fully withdrawable modules available in standard configurations are, 3-pole or 4-pole; with 125A, 315A, 630A rated currents.

* Offers more cost-effective solutions due to compact contact modules.

**** You can contact us for detailed information about our WMCC model, PREMIUM - XW.
